

Abstract

A system is disclosed for the planning, management and execution of events that permits the event manager, client, convention personnel, and suppliers to coordinate activities and rapidly disseminate information. Preferably, the system includes a repository of information. All or portions of the information may be electronically accessed by the various parties, subject to the limitations imposed by the event manager. Real time information is provided to the parties, including the ability to observe the progress of the production of the exhibit in real time from remote locations.
